---

Sometimes it is easier for me if they are kept separate. Two different dates means two different days production data etc., weather conditions, wind direction etc., They are just doing it for fun. You and me have to do the work. They have complained on days when there was no production.

A2019-0514-001

I did not combine this one with [REDACTED] complaint from yesterday since [REDACTED] was complaining of visible emissions, and [REDACTED] is complaining of odor.  
Thanks.
